Action

Oligovit® Kids Oral Solution is a dietary supplement developed primarily for the youngest ones who may have an increased requirement for vitamins supporting their healthy growth and development. Oligovit® Kids Oral Solution contains nine vitamins required to ensure smooth metabolic and biochemical processes in the body. Vitamin D helps maintaining normal muscle function, and is important for calcium metabolism, which promotes the development of healthy teeth and bones. Vitamin E protects the body against free radicals and enhances the general condition of the body. Vitamin A, C, D and B₆ help normal function of the immune system. Vitamin C and E help cells protection from oxidative stress.

Oligovit® Kids Oral Solution is recommended:

- in insufficient dietary intake of vitamins (inadequate, irregular diet)
- as a supplement to winter diet deficient in vitamins
- as a supplement to manage loss of appetite, exhaustion and susceptibility to infections

- as a supplement during antibiotic treatment
- as a supplement in recreational physical activity

Method of use

Children over 3 years of age: Take one teaspoon of the solution once daily.

Children over 6 years of age: Take two teaspoons of the solution once daily.

Note**Shake well before use!**

Dietary supplements should not be used as a replacement for a varied and balanced diet!

Keep out of reach of children.

Warnings

The recommended daily dose should not be exceeded.

Persons taking medication before using this product should consult a doctor or pharmacist.

The product must not be used by persons hypersensitive to B-complex vitamins or to any of the ingredients in the product. Persons with diabetes should talk to their doctor first before taking this product as it is high in sugar.

Not intended for children under 3 years of age.

It is not recommended alongside other products containing vitamins A and D as this can result in excessive levels of these vitamins.
