Galenika – Serbia's oldest pharmaceutical company

GALENIKA AD BEOGRAD was founded on 18th July 1945. This young company with as little as forty-three employees begins its dramatic expansion and development, and, pretty soon, it becomes an important element of the pharmaceutical market in the then Yugoslavia.

In 1947

construction of a complete manufacturing plant at Galenika site, which positioned it as the fourth global manufacturer of penicillin. The first bottle of penicillin was manufactured on 31st July 1949, marking the beginning of Galenika's dramatic development.

In 1950

the scientific-research institute becomes a part of Galenika. Teams of researchers primarily focus on development of generic drugs, implementing their great knowledge and skills in the process. This greatly contributes to the company's development. Galenika's drug products are characterized by a high level of safety, quality and efficiency in treatment. GALENIKA AD BEOGRAD is conquering domestic market with astonishing speed, whereas construction of a new plant marks a turning point in its development.

In 1978

enabled us to take a decisive step outside the national boundaries.

In 1990

Milan Panić, a founder of ICN, an American pharmaceutical company, signs an agreement with Galenika, turning it into ICN Galenika, one of the first privatised companies in the SFR Yugoslavia.

In 2010

opening of a new Solid Dosage Forms Plant, the construction of which cost over 50 million euro. The new plant has the annual capacity of 2 billion tablets and 100 million capsules, and the annual production worth around 100 million euro. The manufacturing process takes place in the area occupying 4,500 m² and meeting all of the requirements of modern pharmaceutical production.

In 2017

Galenika becomes a part of NC Group, the largest pharmaceutical company in Latin America, which is well-known and recognized on a global scale.
